The speed with which the decision to tear up the C.N.B. line we of the city was arrived at—or is said to have been arrived at—is one of the suspicious circumstances of the business. If there is such a terrible shortage of rails at omake this necessary, that as to make this necessary, that day, nor can the knowledge of the shortage have broken upon the Allied authorities with the unvaried suddenness the Canadian public are invited to suppose. The theory that the Allies just woke up on Thursday to discover the theory that the Allies just woke up on Thursday to discover the theory that the Allies just woke up on Thursday to discover the thing that the same dispatch which the which made it necessary to appeal to Canada to tear up a thousand miles or so of rack does not sound reasonable. It is equally peculiar that the same dispatch which told of this appeal having been made of fall ways had already decided that of all the railway lines in Canada this particular one was the one to be commandered. The project looks suspiciously like one that had originated in Ottwas for the relief of Makecausie the supplied of the supplied on thing to allay the suspicion.

We reproduce here a few announcements of Goodyear Tires. The advertising of Goodyear Tires is printed in many languages in many parts of the world.

Of more importance is the cause of this worldwide advertising, viz.: world-wide sales. For the worldwide sale of Goodyear Tires has resulted in manifold benefits to motorists all over the world.

### World-Wide Demand Enables Us To Increase Quality

Just as Goodyear quality inevitably resulted in world-wide sales, so world-wide sales enable us to increase the quality.

World-wide sales mean tremendous production and a consequent cutting down of overhead expense on each individual tire.

World-wide sales mean a tremendous manufacture it in cludes high-salered them the first materials at the lowest prices. Above all, world-wide sales mean a tremendous manufacturing organization. This huge Goodyear army includes the leaders in every process in tire manufacture. It includes high-salaried chemists and engineers who experiment with and evolve new and better formulas and designs. The result is a continuous series of betterments in Goodyear Tires.

An organization less than world-wide could not maintain such a staff. But spread over the entire production of the Goodyear factories, the cost of improving tires practically disappears.

Every Country Hears The Story Of Greater Mileage -**Better Service**
